

Core Communications

105 Executive Dr., Dulles, VA 20166

September 20, 2004

To Whom It May Concern:

Mr. Jerry Bennett, through his company Psyclone Systems Corporation, was contracted by Core Communications on an ongoing basis from September of 2003 to August of 2004.

Jerry worked as a field engineer and on our installation teams. He often worked alone and without supervision. His duties included researching and engineering solutions for large network implementations throughout the U.S.

Core Communications is a provider of internet access solutions and managed services for some of America's largest hotel chains.

Jerry architected networks, ordered routers, bridges and transmission equipment, managed wiring contractors and installed the networks to the client's specifications. He is well versed in traditional wired LAN / WAN networks and WiFi implementations.

We would be happy to give Jerry additional work any time his schedule would permit.

Sincerely,

Ms. Dawn Miller
Project Manager
