RE: Verification of Engagement: Jerry W. Bennett

To Whom It May Concern:

While employed as a Manager for KPMG Peat Marwick (1993-1994) Mr. Bennett provided IBM Global Services (then Integrated Systems Solutions Corp) and the Hertz Corporation, an Information Technology (IT) benchmark study and best practices action plan. This plan saved IBM and Hertz millions of dollars over the life of the outsourcing contract of which I was Project Executive.

After retirement from IBM, I still produce copies of that report as an example of excellence in consulting. The content was well researched, the presentation was professional and the recommendations were valuable. It is extremely hard to find such quality work in today's professional services environment.

I would again engage or employ Jerry for any Information Technology project of any scope with confidence.

Sincerely,

Mr. William Eldridge
Former Project Executive
Hertz Corporation
Integrated Systems Solutions Corporation
